

You are invited to three community conversations hosted by New Bedford Public Schools

New Bedford Public Schools will host three community meetings as part of a conversation about the school system's future.

At these meetings, NBPS and the community will discuss the district's Accelerated Improvement Plan, (AIP) and that what means for every child in our school system. This plan outlines the steps NBPS are taking to reach excellence – in every classroom and in every school – and the ways to ensure the district will stay on track in its improvement efforts.

In New Bedford, our plan for improvement has four goals:

1. **High-quality teaching** will be a priority for New Bedford Public Schools. This involves defining what excellent teaching looks like and identifying strategies and tools for teacher success that will be used across the district.
2. **Using data** so our teachers and school leaders will target support to students in the areas where they need it most. Focusing on important data will help us know what we are doing well and what we need to adjust to ensure progress with all students.
3. **Developing talent** among our teachers and school leaders, as NBPS provides more professional development opportunities than ever before and new ways for both school leaders and teachers to give and receive constructive feedback on the job.
4. **Staying the course in making progress, by seeking guidance, from the community** (families, employees and

community members) to help us stay focused on what we are trying to accomplish. This input will inform our decisions on how the community can ensure our students' success.

The three Community Conversations meetings will take place at the following locations:

- Wednesday, February 11, 2015 – 6:00 p.m. – Roosevelt Middle School
- Thursday, February 12, 2015 – 6:00 p.m. – Keith Middle School
- Monday, February 23, 2015 – 6:00 p.m. – Normandin Middle School

“This invitation extends not only to parents, but to all members of the community. The education of our children affects the entire region,” said Dr. Pia Durkin, Superintendent of Schools.
