

New Bedford Based Novex Seeks Migraine Sufferers for Clinical Trial

Novex prides itself in providing exceptional service to patients.

Do you suffer from migraines?

You can participate in a clinical trial that will give you access to new research treatments before they become readily available and you will help migraine sufferers across the nation, right here in New Bedford!

Help find treatment for yourself and other migraine sufferers!

For this particular clinical trial, they are seeking local migraine sufferers who qualify to participate. As with all clinical trials there is certain criteria that must be met to determine eligibility. If people did not volunteer in medical research studies, like this one, new medications simply wouldn't make it to the market.

Primarily they are looking for those who have migraines defined as "...headaches with intense throbbing in one area of the head that is sometimes accompanied by nausea, vomiting, and extreme sensitivity to light and sound." In addition, if you suffer more than 8 headaches a month at least within the last 3 months and are at least 18–65 years of age, you may qualify. Compensation for time and travel is provided to qualified participants. No insurance is required.

Novex Clinical Research, located on Field Street, is a leader in the field of clinical trials. They also conduct trials for a variety of conditions in addition to Migraines, such as Constipation, Diabetes, Fibromyalgia, High Cholesterol, Multiple Sclerosis, Osteoarthritis, and others.

If you are interested in learning more about clinical research, you can read Novex Clinical Research's FAQ, visit their **website**, **Facebook**, or contact them through e-mail or phone. You can also get directions via their website.
